

AFTERCARE

Our hair can last 12-18+ months with the correct full aftercare.

Lighter and more Ash-toned colours can last 9-12+ months with the correct full aftercare. These shades will have undergone slightly more processing for the finished result.

Aftercare Guide

Avoid washing hair more than twice per week.

Use hair masks regularly.

Always sleep with hair tied away & do not wear tight hair styles more than twice per week.

Only use specialised soft bristle hair extension brushes & do not brush whilst wet (partially dry before brushing).

Don't leave hair to dry naturally & always use heat protection before drying & styling.

Do not use excessive heat or high temperatures on the top of the latex weft area. Always blowdry on medium-cool settings.

Do not use conditioners, oil or masks on the root area & only use products which are sulfate-free.

Keep hair moisturised by using daily leave in conditioners and oil twice per day.

Do not use chemicals or hair dyes (these may reduce the lifespan and cause hair to become dry).

Avoid direct sunbed exposure, swimming pools and protect from UV rays/sun.

Unsure and need further advice?

One of our hair extension professionals will be more than happy to answer any questions during your appointment.
